

ENERGY PROJECTS PLUS

ENVIRONMENTAL POLICY

Energy Projects Plus is a Charity and Company and operates energy efficiency projects in Merseyside and Cheshire working with householders, local authorities, community groups and other organisations. The Charity provides a free impartial advice service and runs specific energy efficiency projects from its offices in Wallasey, Merseyside and Crewe, Cheshire.

The organisation strives to make environmental awareness and responsibility an integral part of our working practice. We try to achieve this by looking at all aspects of how we use materials and resources.

- Comply with relevant environmental legislation and industry codes of practise.
- Seek to reduce environmental impact and prevent pollution in our operating processes.
- Take account of concerns of interested parties such as regulators, stakeholders, employees and the public.
- Set objectives and targets to drive continual improvement programmes and regularly review environmental performance to ensure success.
- Ensure that all employees are aware of this policy and trained in their environmental duties.
- Make this policy available to our stakeholders, customers and the public on demand.

This policy is implemented within the framework of an environmental management system designed to meet the requirements of BS EN ISO 14001, The Charity achieved accreditation in March 2010 for BS 8555 Phase Three. This accreditation was renewed in March 2011 and the charity is currently working towards the full implementation of the ISO 14001 standard by March 2012.

Alun Hughes Chair of Trustees
